Art Unit: 1625

Claim 1-21 and 26-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maryanoff et al. for essentially the reasons of record. It is clear from the art that ethers and hydrocarbons can be used as solvents in the instant 2-step process. It is also clear that use of the same ether solvent for each of the steps is contemplated. See the reference at col. 3, lines 10-20. Applicants have amended claim 1 to remove tetrahydrofuran and t-butyl methyl ether the solvents specifically disclosed by the reference. However use of another cyclic ether or straight or branched chain dialkyl ether as solvent in both steps would have been manifestly obvious to the ordinarily skilled worker in the art.

The process described by applicants in the specification is not “continuous in the sense that after the first reaction is completed, the second is run without intermediate steps. Note that the reaction mixture is filtered and then some of the solvent is evaporated before the second step is run.

Applicants have not shown that by using glyme as the solvent in both steps that a process giving unexpectedly improved results occurs.

Applicant's arguments filed 10-13-2005 have been fully considered but they are not persuasive. The actual process taught by Maryanoff is as “continuous” as that performed by applicants. Note for example that both concentrate the reaction mixture obtained from the first reaction step.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1625

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
